

# Portainer Environment Configuration

On the left side menu of Portainer click on the environment tab to add a new environment.

Under Environment type click on Docker

Environment type

 <b>Agent</b> Portainer agent	 <b>Edge Agent</b> Portainer Edge agent	  <b>Docker</b> Directly connect to the Docker API
---	---	--

Fill out the name and the "Environment URL" as follows

<b>Name</b>	Graylog
<b>Connect via socket</b>	<input type="checkbox"/>
<b>Environment URL</b> 	192.168.2.247:2375
<b>Public IP</b> 	e.g. 10.0.0.10 or mydocker.mydomain.com
<b>TLS</b> 	<input type="checkbox"/>

We are not using TLS on this, since it is not a production setup so we can skip it.

---
