Nord VPN Configuration

Whitelist Local IP's

After installing and nordvpn we need to whitelist the local subnets if we need to transfer files while being on the tunnel.

```
nordvpn whitelist remove all
nordvpn whitelist add subnet 192.168.0.0/16
```

This will generally work now. But if now we also need to route with iptables

```
ip route add 192.168.2.0/24 via 192.168.252.1
```
